MONEY AND STOCKS.

PINANCIAL AND COMMERCIAL.

New York Financial Market, NEW YORK, May 12.-Money-On call easy at

Prime Mercantile Paper-405 per cent Poreign Exchange-Higher at 487 for sixty days,

and 489 for short sight. The tales of stocks to-day aggregated 265,967 shares, including: Delaware, Lackawanna and Western, 39,370; Delaware and Hudson, 6,900; Lake Shore, 24,40; Louisville and Nashville, 6,680; Northwestern, 35,000; New York Central, 51,500; Pacific Mail, 6,880; Union Pacific, 19,000; St. Paul, 44,660; Northern Pacific preferred, 4,700; Oregon

and Transcontinental, 8,400 shares. Government bonds are unchanged in quotations, except an advance to 103% in the 3's. There were sales of the coupon 41/2 per cents. at 1121/2. and the 4's registered at 121%

State securities have been quiet. The Alabama

and Michigan issues are quoted 1 to 2 per cent. Railroad bonds have been active, and prices gen-

erally strong until late in the afternoon, when there was yielding in some cases, especially Erie

The stock market has been frregular, but mod erately active all day. Prices opened about steady, and under heavy selling yielded a fraction during the first hour, then rallied and continued steady on slight fluctuations until after 1 o'clock, when they became strong again, and the highest prices of the day were realized. About the beginning of the last hour, under the influence of a heavy selling movement by the bears, and a disposition to realize by the small traders, prices again weak-ened. Notwithstanding the weakness in New Central, Lake Shore was well held, The and closed with a gain of grangers were strong most of the day. Omana preferred is unchanged. There was unusual activity in Oregon Trancontinental and the stock was up % per cent. this evening. Louisville and Nashville shows a gain of % per cent. Other changes were for small fractions. Most of the business was done in half dozen stocks. Sales of New York Central, St. Paul, Northwest, Lacka-wanna, Lake Shore and Union Pacific aggregate nearly 75 per cent. of the day's business. The market closed weak. Leading bulls insist to-day the Vanderbilt stocks must separate from the rest of the market. They claim they are receiving no support, and only a clog on what would other-wise be a decidedly strong market. They insist that the Vanderbilt party lost heavily when both New York Central and Lake Shore were much higher than they are selling at present, and that their scheme now is to depress the price much as essible before buying again. Friends of Union ecific say that the stock is being largely bought by insiders on a showing of increased earnings and reduction of the floating debt, and large land sales as well as heavy purchases of Canada Pacific consols by the Trustees for the sinking rund. It is estimated that the principal bear leaders in the at present are short as much as 500,000 shares of stock. Leading bear operators have been taking a much more active interest in the market for the past few days, including to day, than for a long Transactions to-day agere ated 266,000 shares, as

COMMERCIAL.

bry goods are not doing a rushing business, the weather continuing too cool to permit of much summer trade so far. Prices, however, are unchanged. A more cheerful feeling prevades the grocery market, there being an improved demand and firmer prices. Butter and cheese still remain weak. Eggs and poultry continue firm. GRAIN.

Wheat-The firm feeling in local circles is well maintained and quotations are a shade higher than Monday. Under light receipts all gradable stock will readily bring full quotations. The effect of general light receipts is seen in the large decrease of the visible supply, which is over a million and a half bushels. Farmers are too busy and too indifferent at present to pose as free shippers, evidently preferring to wait and figure on probable yield of the present growing crops and the per cent, of the alleged great damage.

Corn-Local circles continue in about the same position as Monday, with both fair demand and offering. Futures quiet with few sellers and no buyers. Receipts light and shipments only fair. Seaboard generally lower. New York, 1340 off, Balti-

more 360 off and Chicago steady. Oats-Rather steady with fair local demand. The following table shows the receipts of grain at this point for the past twenty-four hours:

	70061463

MARKETS BY TELEGRAPH.

Produce Markets.

CHICAGO, May 12 .- In spite of a decrease of nearly 2,010,000 bushels in the visible supply of wheat the market ruled excited and lower, with a rather heavy feeling prevailing after midday. The opening was steady, but a strong selling pressure was discernible soon afterward, and from then on to the latest trading in the afternoon the trend was downward. One of the causes assigned was an increased acreage in portions of the spring wheat belt, and reports from Minnesota and Da keta that spring wheat generally was looking well. The closing figures of the day were 11/sc under the latest figures of yesterday, and 256c under the highest prices current at one time yesterday. The receipts were larger, and foreign advices quoted quiet markets. There was a moderate speculative and shipping inquiry for corn, and it ruled lower, but values were well sustained in comparison with wheat, and the closing was only a shade under yesterday. There was a good ship-ping demand for oats, and prices ruled steady throughout. Provisions ruled dul and easy, mess pork dectining 10@15c. Flour-Quiet and unchanged. Wheat-The visible supply showed a marked decrease, but offerings were free and prices declined %c, rallied %c, fell back to inside figures and closed on the regular board 1c under yesterday. Sales ranged: May, 8c% 688% 4c, closed at 88% 4c; June, 90 991% c, closed at 90 690%; July, 92% 693% c, closed at 92% c; No. 2 spring, 88% c; No. 2 red, 99c@\$1; No. 3 red, 88% 688 89c. Corn—There was a moderate shipping and speculative inquiry. The market declined % 2, advanced % c, again fell back % c for fluctuation and closed % c under yesterday; cash, 47% c; May, 47% 648% 4c, closed at 47% 6c; July, 47% 648% c; June, 47% 648c, closed at 47% c. closed at 475%c; July, 47% @48%c, closed at 47%c. Oats-There was a good demand with prices 1/4@ 1/5c higher early, but fell back and closed steady: cash. 8444@34%c: May, 3414@34%c; June, 34%@34%c, closed at 34%c; July, 3144@34%c, closed at 3-%c Rye-Firm; No 2. 73c, Barley-Nominal. Methods of Cultivating Corn. |Philadelphia Record. |

Corn is now the most important crop which will receive the farmer's consideration until it is fully matured and harvested. It is a semi-tropical plant and requires plenty of heat and moisture. In some sections the most productive varieties can not be grown owing to the short season for growth, and consequently every advantage of quality and yield must be sacrificed in order to obtain early maturity. In the South the white flint varieties are preferred, such corn giving the best results on soil that would be unproductive with the yellow kinds. The flints also serve a greater number of purposes, being especially adapted to the making of hominy and a finer quality of

meal. The usual method of cultivating corn is to 'check" it off into rows four feet apart each way, with three stalks of corn at the intersections of the rows, each bill consequently being four feet in every direction from the next. This system is what is known as the level mode of cultivation, the cultivator only being used, except, as is sometimes done, the harrow is passed over the field when the plants are very young. No hoeing is required in thus cultivating corn, as the work is done in two directions, and hence it is considered labor saving. The mode is so well known as to require no suggestions here.

There is another method of cultivation.

however, though net generally practiced in this section, which deserves attention from farmers. It is to plant corn in rows four feet apart and from eighteen inches to two feet apart in the rows, according to distance preferred. Three grains of seed are allowed to the hill, but after the corn is six inches high the two weaker plants are drawn out. leaving the stronger one only standing. By this arrangement the ground will have one stalk of corn growing every two feet in the rows, whereas in the "check" system there will be three stalks every four feet. It is plain that the latter method allows of a much larger number of stalks to an acre, while the cultivation is easy. With the stalks two feet apart, the plaw (one-horse) is passed close to the corn, throwing the dirt from the plants, leaving the rows ridged up, with a ridge in the center, between the rows of corn. This is done to prevent the labor of hoeing, as the young grass is destroyed by the plow. After the corn has made further growth and the grass has again appeared the plow is once more used, the dirt being thrown back to the corn rows. Later in the season the cultivator is used between the rows, while a single hoeing suffices to destroy the grass between the rows until the corn is safe from intruding weeds and grasses. The point to be observed is that while the

'check" system requires less labor, and allows of a greater number of stalks to grow on an acre, the pian of allowing each stalk of corn to be two feet away in one direction and four feet in the other from its neignbors. gives it greater feeding room and less competition in its struggle for plant food, as the worst enemy a plant can have is another of the same kind growing by its side. If such a method of planting does best on inferior soil, there is no reason why it should not incresse the yield on fertile soil. True, the number of plants will be less, but the corn having greater opportunities for growth, es changed. Receipts-Flour, 9,942 obls.; wheat, 76,- I pecially when young, will mature earlier,

give a heavier yield and be less susceptible to drought. It is an experiment worth trying, as farmers are often anxious about giving the corn an early start. When the plants are well grown, the roots will cover all the ground, whether the corn is checked or not: but when the plants are very young, the advantage of having each one two feet from the next will give them an opportunity of making rapid growth at a time when it is

most desired. The light of investigation has irradiated many things that have long been shronded in doubt and darkness. Medical science has shown that rheumatism and neuralgia are due to an impure condition of the blood Athlophoros, the great specific for those dreadful maladies, operates upon the blood, muscles and joints, dissolves the acids that cause direase, and by driving them from the system brings relief to the sufferer. H. S. Chandler, of the New York Independent, was cured of rheumatism of two years stand-

Breast of Lamb Filleted.-Skewer two clean breasts of lamb together, stew them very gently in a quart of water with three onions, one carrot and a bunch of herbs until tender; take out the bones, place the meat between the two dishes to get cold; when cold cut into slices about an inch thick, dip them in eggs, then sprinkle with chopped parsley and breast crumbs; fry a nice brown and serve on mashed potatoes.

"Love Sees No Faults."

It has been said; but when a woman is dragged down, emaciated, wan and a shadow of her former self, with never a caeerful word, she can be no longer beautiful or lovable. Nature may have been generous in her gifts and endowed her with all the charms of her sex, but disease has crept in unawares and stolen the roses from her cheeks, the luster from her eye and the sunshine from her heart. But to be well again lies in your own power Take Dr. Pierce's "Favorite Prescription;" it will cure you; thousands have been cured by it. Nothing equals it for all the painful maladies and weaknesses peculiar to women. Price reduced to \$1. By druggiets.

Egg Pie,-Hard-boiled eggs taste good at any time, but never so well as when, like the four and twenty blackbirds, they are in a pie. Boil a dozen eggs hard, and, when cold, shell and slice them and put them in ST. LOUIS, May 12,-Cotton-Slow; middling, layers in a buttered pie dish, alternating with butter, breadcrumbs, peoper and salt, and covering them with this mixture. Add a cupful of cream and bake to a brown.

"The Dyspeptic's Refuge "

"I am thirty-five years old," writes Mr. Charles H. Watts, of West Somers, Putnam County, New York, 'and had suffered from dyspepsia for fifteen years. The carrent treatment did me no good. Listlessly and without hope I gave Parker's Tonic a trial. I can give the result in three words: It cured me." It will care you.

A chicken omelet, which is a fine entree. is nade by beating four eggs very light; then add two tablespoonfuls of milk and one of butter and a teaspoonful of sait; then, just before putting it into the pan, stir in a teacupful of chicken meat, cut in small bits.

know thyself, by reading the 'Science of Life," the best medical work ever published, for young and middle-aged men.

Fertilizers will give quicker results than manure, but the effects of manure are, as a rule, more lasting and durable.

Young Men!-Read This.
